

What government tests tell us about...

Pesticides in Imported Grapes

- Pesticides were found on 86 percent of the imported grapes tested.
- There were 35 pesticides found on imported grapes:
2,4-D, Azinphos Methyl, Benomyl, Captan, Carbaryl, Carbofuran, Chlorothalonil, Chlorpropham, Chlorpyrifos, DDT, DDVP (Dichlorvos), Diazinon, Dicloran, Dicofol, Dimethoate, Diphenylamine (DPA), Endosulfans, Fenbutatin Oxide, Fenvalerate, Heptachlor, Iprodione, Malathion, Metalaxyl, Methamidophos, Methomyl, Mevinphos, Myclobutanil, Parathion, Parathion-methyl, Phosmet, Piperonyl butoxide, Procymidone, Tebuconazole, Thiabendazole, THPI (Tetrahydrophthalim), Vinclozolin
- The three pesticides found most often on imported grapes were Captan, Iprodione, and Dimethoate.

Imported Grapes with the most pesticide residues

Sample 1	Sample 2	Sample 3
<p>Captan</p> <p>Carbaryl</p> <p>Chlorpyrifos</p> <p>Dimethoate</p> <p>Iprodione</p> <p>Myclobutanil</p> <p>Vinclozolin</p>	<p>Azinphos Methyl</p> <p>Captan</p> <p>Chlorpyrifos</p> <p>Dimethoate</p> <p>Iprodione</p> <p>Myclobutanil</p> <p>Vinclozolin</p>	<p>Benomyl</p> <p>Captan</p> <p>Chlorpyrifos</p> <p>Dimethoate</p> <p>Iprodione</p> <p>Mevinphos</p>

-Animal Carcinogen Immune System
 -Causes Birth Defects in Animals
 -Damages Reproductive System
 -Interferes with Hormones
 -Damages Brain and Nervous System
 -Damages

Most Imported Grapes are contaminated with more than one pesticide.
