**The Estate:** The Azeinda Agricola Bettili is one of the first wineries in Italy to convert both the cultivation of grapes and the wine manufacturing to organic. “The organic cultivation excludes any use of synthetic or chemically produced fertilizers, herbicides, and anti-parasites. Only the experience of our ancestors and the use of ancient remedies can guarantee a natural quality for the entire production, from the planting of the vines all the way into the bottles.”

Located in the town of Soave in the heart of Italy’s Veneto region, Bettili’s varietal production includes a typical and traditional Valpolicella, Merlot, Soave, and a few table wine blends Bettili now makes wines across the DOCs of Soave, Valpolicella, and Lison Pramaggiore. Clarification is done using bentonite clay instead of animal products such as casein or isinglass making this wine suitable for vegan consumers. Bettili produces several wines exclusively for the Organic Vintners brand.
